Steve Ucho

# Manage Tag

To find if user exists
Line 203 in main.py
"SELECT * FROM person WHERE username = %s"

Insert tag into table 0 for tagstatus if not self tag, 1 for self tag
Line 211 and Line 249 in main.py
"INSERT INTO tagged (username, photoID, tagstatus) VALUES (%s, %s, %s)"

Check if user being tagged can see the image
Line 219 in main.py
"SELECT * "
"FROM photo AS p1 "
"WHERE photoID = %s "
"AND (EXISTS ("
                "SELECT * "
                "FROM follow "
                "WHERE follow.username_followed = p1.photoPoster "
                "AND follow.username_follower = %s "
                "AND followstatus = 1) "
"OR EXISTS ("
                "SELECT * "
                "FROM follow "
                "WHERE follow.username_follower = p1.photoPoster "
                "AND follow.username_followed = %s "
                "AND followstatus = 1) "
                ")"
"OR EXISTS ("
                "SELECT * "
                "FROM sharedWith as s1 "
                "WHERE photoID = p1.photoID "
                "AND (groupOwner, groupName) IN ("
                                        "SELECT groupOwner, groupName "
                                        "FROM belongTo "
                                        "WHERE member_username = %s "
                                        ") "
                ") "

Update tag as tag accepted
Line 260 in main.py
"UPDATE tagged SET tagstatus = 1 WHERE username = %s AND photoID = %s"

Delete the row if tag declined
Line 269 in main.py
"DELETE FROM tagged WHERE (username = %s AND photoID = %s)"
